

Gp5_Workshop 2 : Identifying the trees

→ Explain the different steps (and the tools that you need) to identify the trees.

We had to watch and identify the trees. We labeled the trees with sello tape and colored markers .

We used identification cards. We compared the leaves of the trees with the pictures on the identification cards.

There were different trees :

- Pear tree
- Apple tree
- Walnut tree
- Plum tree
- Hazel tree

It was long and a bit difficult to identify the trees.
