

Sowing carrots

In the morning we went to the farm, we created growing beds. The growing beds are used to plant the vegetables in it.

On the growing beds that we created together in the morning, we started by slowly pushing the gridder as we walked along the growing beds.

The gridder drew small squares on the compost.

After pushing the gridder, we used the seeder : we pushed it along the 8 lines on the growing beds.

After our departure, Gaël watered the seeds.
